

Kalmar K-Motion. All the power. 40% less fuel.

Training for technicians and operators.

Get the most from K-Motion everyday.

K-Motion is an innovative drive train system that helps you dramatically reduce your fuel bill and emissions without compromising on the power that you need for day to day operations. To make sure that you get the most from K-Motion we have designed a number of courses for both your technicians and machine operators. Each course is designed to help the participant optimise their machines performance and to make sure they are benefiting from the great fuel savings that K-Motion technology can achieve.

There are three courses for you to choose from, two for your technicians and one for your operators.

Technical training for reachstackers with K-Motion.

Course reference: **204-010**
Course duration: **2 full days**

What you will learn:

You will be technically trained on how to measure the effectiveness of K-Motion compared to other reachstacker transmission systems. Focus will be on the KDCS - Kalmar Distributed Control System, hydraulic system, wiring diagrams and troubleshooting. This will be a mix of theoretical and hands-on training.

Advanced technical training on K-Motion transmission.

Course reference: **356-003**
Course duration: **1.5 days**

What you will learn:

This course consists of 1 day of classroom learning, followed by half a day of hands on practical application putting into practice what you have learnt on a reachstacker. You will learn about the CVT and Power-split technology, the K-Motion drive train with HVT transmission, HVT functionality and control, HVT service and maintenance and HVT troubleshooting.

Operator training for reachstackers with K-Motion.

Course reference: **504-003**
Course duration:

Dependant on participants.

What you will learn:

This course is a mixture of theoretical and hands-on training for operators of reachstackers using K-Motion. Your operators will learn new driving techniques, ways to optimise fuel consumption, what they should be inspecting each day and what new error codes mean.
