Super Gloria breaks records in Spain

Two Kalmar Gloria DRG1300-92ZX reachstackers, the largest reachstackers ever built, help Tadarsa Logistics S.L. move gigantic wind turbine sections in Avilés, Spain.

Name Tadarsa Logistics S.L.
Location Avilés, Spain
Employees 42 in Tadarsa Logistics S.L.
2.000 in GRUPO DANIEL ALONSO

Kalmar fleet Two Kalmar Gloria DRG1300-92ZX reachstackers and four Kalmar DRF450 reachstackers in Spain, two Kalmar DRF450 reachstackers in Brazil

The challenge

Tadarsa Logistics S.L. provides an all-round logistics service with a global reach. It is part of the Daniel Alonso Group, which has more than 50 years of experience in the design and manufacturing of steel tubular structures, pressure vessels and large metal structures, steel treatment and the logistic management and storage of end products, among many other activities. Tadarsa operates on a 20,000 m² manufacturing area less than 1km away from the port of Avilés in northern Spain.

Tadarsa contacted Kalmar with the need for equipment capable of lifting heavy wind turbine sections, which can weigh up to 260 tonnes. "We chose to work with Kalmar because they are such a well-respected global company and we couldn't trust anyone else to take on such a mammoth task," says **Samuel Iglesias**, Director, TADARSA LOGISTICS S.L.

The solution

Kalmar rose to the challenge with a proposal for the world's largest reachstacker. "This order presented a technical challenge that we were very pleased to meet. They needed a reachstacker to handle a critical application and this called for the development of the biggest machine ever built," says **Stefan Johansson**, Director, Sales and Marketing, Kalmar Reachstackers and Empty Container Handlers.

Kalmar delivered two Super Gloria reachstackers capable of lifting a record weight of 130 tonnes. The previous world lift record was set by Kalmar in Sweden in 2014, when a reachstacker lifted 103 tonnes. Tadarsa's two Super Glorias, however, have now extended the lifting capacity further than any previous reachstacker built for industrial application.

The results

Tadarsa is delighted with the end result. "Kalmar had an excellent concept and proposal and their team was outstanding from beginning to end. They met our specification in every way and the two Super Glorias will have a huge impact on our business," Samuel Iglesias enthuses.
